

AE-D1

AE-D1 electrothermal actuator can be used with electrical on/off to activate several types of valves and floor heating manifolds.

Specification:

Power supply: 24VAC, 120VAC, 230VAC, 50/60Hz

Power consumption: 2VA

Nominal torque: 110N

Stroke: 3mm

Full travel is 3-5 min.

Connecting screw: M 30 x 1.5mm

Cable: 900mm length

Sensitive element: Electrothermal Wax Sensor

Housing material: self-extinguishing PC

Protection class: IP54

Working ambient temperature: 0~65°C

Mounting position: Vertical position to 85°declined
